

DEAR LADIES AND GENTLEMEN,

We are specialized in production of high quality red wines of Merlot, Cabernet Sauvignon and Mavrud grape varieties, divided in boutique series in limited quantity.

Style, gentleness, and quality are the main ingredients of TODOROFF wines, based on the strict control of the selection of small, unique for their content and quality brands of grapes. The high technological opportunities allow us to control and optimize all the processes of vinification.

The preliminarily selected sorts of wine resulted from biological analysis of the raw grape. Once the grape is considered to have reached the quality standards required by the company, it is manually picked up with the greatest care, put into cage, thus preserving its entity and good quality during the whole process of production. In order to satisfy the individual requirements of its clients, TODOROFF Wine Cellar works over several styles of wines.
